

HACKSPHERE 2026

PHASE 1 PROPOSAL IDEA

Project Title
<i>[Enter Project Title]</i>

Team Identity	
Team Name	<i>[Enter Team Name]</i>
Team Category	<i>[e.g., National / International (All Mem) / International (Mix)]</i>

Team Leader's Personal Information	
Name	<i>[Enter Name]</i>
Student Status (Current)	<i>[e.g., High School Student / College Student]</i>
Email	<i>[name@email.com]</i>
Country	<i>[e.g., Indonesia / Other Country]</i>
Institution	<i>[Enter Institution Name]</i>
Member 1 Personal Information	
Name	<i>[Enter Name]</i>
Student Status (Current)	<i>[e.g., High School Student / College Student]</i>
Email	<i>[name@email.com]</i>
Country	<i>[e.g., Indonesia / Other Country]</i>
Institution	<i>[Enter Institution Name]</i>
Member 2 Personal Information	
Name	<i>[Enter Name]</i>
Student Status (Current)	<i>[e.g., High School Student / College Student]</i>
Email	<i>[name@email.com]</i>
Country	<i>[e.g., Indonesia / Other Country]</i>
Institution	<i>[Enter Institution Name]</i>

1. Executive Summary

[Instructions: Write a concise paragraph that serves as an elevator pitch. Briefly explain the name of your product, the main problem it solves, and how it works. The judges should be able to understand the essence of your idea just by reading this paragraph.]

2. Problem Statement

[Instructions: Explain the background of the problem you wish to address. Do not rely solely on opinions. You MUST include supporting data, research findings, facts, or statistics (include sources or links to the research, if available) that demonstrate that this problem is urgent and real in the field.]

3. Proposed Solution & Value Proposition

[Instructions: Explain the concept behind your solution. What makes this idea special? Focus on the value proposition. Why is this solution better, cheaper, or more efficient than similar apps or systems currently available on the market?]

4. Minimum Viable Product (MVP) / Key Features

[Instructions: List 3 to 5 core features that you will DEFINITELY develop and complete the code for later. The features must be logical and highly feasible.]

5. Target Market & Impact Viability

[Instructions: Define VERY SPECIFICALLY who the active users of this app are (e.g., "College students living away from home, ages 18–22" or "Rice farmers in lowland areas"). Also explain its potential for scalability—how this project can grow and have a broader economic and social impact in the future.]

6. Tech Stack & System Architecture

[Instructions: List the technical specifications you will use. Also include a System Architecture Diagram (Flowchart/Data Flow) that illustrates the workflow of your application from the front-end, back-end, and database perspectives.]
